

BIOJUVE™ BIOME SUPPORT COMPLEX

Hydrates the skin and helps restore natural radiance

Supports skin defenses from daily exposure to environmental factors.

Product Description

BIOJUVE Biome Support Complex is a supplemental, extracted blend of microbe-derived proteins, polypeptides, antioxidants and more that helps support and enhance the living microbe technology found in the Living Biome Essentials Serum.

Skin Concerns

This nourishing wake-up call provides an added boost to the BIOJUVE morning regimen by helping to tighten, firm and lightly hydrate the skin, while assisting in optimizing skin health and restoring natural radiance.

Why It's Different

BIOJUVE cares for both skin and its microbiome to help skin achieve its full potential. BIOJUVE uses living microbes to produce and deliver an unmatched blend of key Bioessentials™ that work with our skin's natural biology for a wide range of skin health benefits and delivers fast results.

How To Use

Apply 1-2 pumps onto clean, dry skin of the face and neck.

Key Ingredients

The Biome Support Complex contains a concentrate of the Xycrobes Bioessentials produced to help support the skin's natural environment.
